

Risk-free Modernization of Microsoft Technology Stack Platform Modernization, Migration to Cloud, Mobile Enablement.

WHY MODERNIZE?

Legacy software applications are a source of frustration with poor user experience, high maintenance costs and costly new feature development. Legacy software platforms also fail to give an integrated user experience as they are not designed for cloud and mobile usage.

With a modernization initiative, an enterprise can achieve the following benefits:

Take advantage of new IT architectures

- Cloud computing
- Service oriented architecture
- Mobile support

Reduce Cost of

- New feature development
- Application maintenance and support

Better User Experience

- Multiple device support
- Easier 3rd party integration
- Multiple language support

THE COST OF DOING NOTHING

- Increased Total Cost of Ownership
- Integration complexity
- Unsupported technologies
- Shortage of skilled personnel
- Long new feature release cycles

RISK-FREE MODERNIZATION WITH VALUESOFT

We guarantee risk free modernization of your Microsoft technology stack. Armed with the experience of migrating 10 Million lines of code, migration process expertise and the best modernization IP in the industry, we guarantee fastest migration with zero application downtime.

| Modernization Risks | How we address them |
|--------------------------|---|
| Business Continuity Risk | <ul style="list-style-type: none"> • A free POC to showcase modernization process • Experience of migrating 10 Million lines of code for guaranteed execution • Microsoft certified global partner for modernization |
